

SUE QUAM

I will use my four years of LWV Board leadership, 30 years of government experience and master's in public administration to give back to my community through practical, accountable action.

Protect cannabis tax revenue by directing it to resident services—not unrelated general expenses. Priorities should include items such as subsidized transportation for taxi rides, window replacements, expanded Meals on Wheels, and other programs for qualifying seniors and low-income families.

Create and fund safety programs for residents walking pets, grandchildren or living with disabilities in coyote-prone areas. I will support a small dog park or adjust existing dog-park hours for small pets.

As coyote populations grow, promote responsible wildlife management that balances ecology, controls rodents, prevents feeding, uses professional hazing, and keeps wildlife at a safe distance.

Work with regional partners to strengthen fire and police protection, water, sewer, electrical grid services, and environmental safeguards. I will vote to maintain golf cart paths, improve traffic lights, and expand technology for remote public participation in council meetings.

Advocate tirelessly to protect residents' federal, state, and county social safety nets.

I respectfully ask for your vote to pursue these priorities and help run an efficient, responsive city government.
